

TABCO 3000 INDUSTRIAL RAIL SYSTEM

Welded Aluminum

The Tabco 3000 welded railing system is the top of the line utility handrail system that provides rigid construction for additional safety. There are no moving parts, only heavy duty welded integrity to provide years of maintenance free service.

The system is manufactured in strict accordance to shop drawings and requires minimum field erection with easily connected panels.

For exceptional strength, the Tabco 3000 welded railing system is your best selection for high traffic areas.

It's smooth, uninterrupted and aesthetically pleasing surface design makes it a popular choice for both installation contractors and municipalities.
